To Whom It May Concern:

Aerodyne Research, LLC has tested the fit of the Mars M2 AAD in the Icon harness and container systems. We have determined that the device, when properly installed, is compatible with all Icon systems and does not interfere with their normal manual operations.

Aerodyne does not endorse and has not tested the reliability or functionality of the Mars M2, nor of any other AAD system. Aerodyne makes no representations or warranties, express, implied or otherwise regarding any aspect of this or any other AAD. Users who choose to install an AAD do so at their own risk and assume any liability associated with the use of the device.

If you have any questions, you may contact us at the number listed above.

A handwritten signature in black ink, appearing to read "W. Legard", written over a horizontal line.
