Model: m2 – device for testing H/C according with PIA TS-112
3. Main Canopy
RAPTOR 108
Producer: JOJO WINGS s.r.o.
4. Reserve canopy
WP 110
Producer: MarS a.s.
5. Rigging – Zbynek Zivny, master rigger CAA 0857
Records – Antonin Haas, technician
Supervisor – Dipl. Ing Vratislav Maly
6. Others
Place: Jevicko, Czech Republic
Date: 16/05/2012
Original producers 'manuals.

Eighteen tests were performed according with PIA TS-112 v1.0. Records in Matrix. The AAD m2 was assembled in H/C according with manual of H/C producer and manual of AAD producer. All records with camera model Panasonic Lumix FZ 150 (50 frames per second).

RESULT

H/C, AAD and Pilot Chute worked properly in all tests. Tests passed all criteria in AAD activation and coordination with H/C and Pilot Chute of PIA TS-112.

MarS a.s. declare – if AAD m2 is installed correctly in the way described in the manual, it will neither interfere nor obstruct the TSOed functions of the NEXT harness/container system.

Report: Dipl.Ing.Vratislav Maly, MarS a.s.
